

Wanda wonders about our part in the air cycle.

Acknowledge Our Part Environmental Messenger

Air Cycle

THE OXYGEN WE ARE BREATHING IN RIGHT NOW, COULD HAVE COME FROM THIS TREE, OR FROM AS FAR AWAY AS THE AMAZON RAIN FOREST!

WITHOUT OXYGEN TO BREATHE, WE WOULD LIVE FOR LESS THAN THREE MINUTES!

When you breathe in, you are borrowing air from the environment, and when you breathe out, you are giving it back!

Doing things to support plant life, helps to support us.

Business is also part of the air cycle.

Business uses air to cool, to bake, to dry, to separate, to transport, to evaporate, to clean, as well as making it part of their products.

Imagine a society where we ...

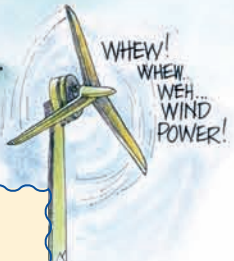

- design operations and products so there are no air emissions
- release to the air only that which supports the earth and its creatures
- borrow and give back, wasting nothing

You must be the change you wish to see in the world.

Mahatma Gandhi

Questions

- How do you use the air at work?
- What do you release into the air?
- What things do you do to control releases into the air?
- What things do you do to improve air quality?
- What can you do to support the health of our air?

BREATHING IN & BREATHING OUT
