

Wanda wonders how we are part of nature's cycles.

Everything we eat, drink, work, and play with, comes from the earth.

Business is also a part of the environment.

The health of our businesses depends on the health of our environment.

Business borrows water, air and resources from the earth.

Food for industry are the natural resources we borrow from the earth.

Questions

How do you use air, water and resources at work?

How do you use air, water and resources at home?

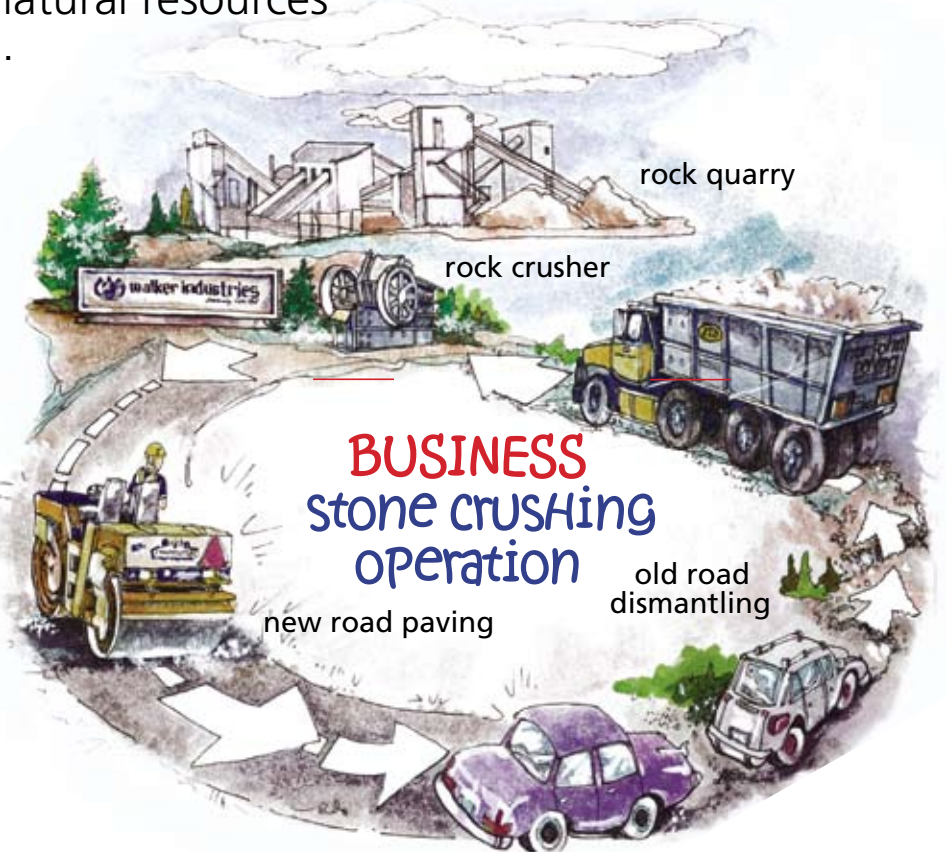

What do you release to the environment?

How does what you release support the health of the environment?

What ideas do you have to change things to better support the environment?

Imagine a society WHERE WE . . .

- ONLY take from the earth those resources that we need
- rely on our waste or the wastes of others as our raw materials
- ONLY release back to the environment that WHICH SUPPORTS THE HEALTH OF THE ENVIRONMENT
- borrow and give back, wasting nothing

You must be the change you wish to see in the world.
Mahatma Gandhi
