Reduce Our Impacts Environmental Messenger™

FUELING

EVER NOTICE HOW MANY SIGNS ARE AROUND FUELING STATIONS? THE RULES ARE IMPORTANT TO PROTECT THE ENVIRONMENT!

Over filling, or "topping up", may cause spills. It wastes fuel and it impacts our environment!

Following the proper steps can prevent spills, save money and protect our environment.

Questions

What do you use that could be an ignition source?

Why is it important to put the nozzle in the tank before starting the pump?

What environmental aspects are near your fueling area?

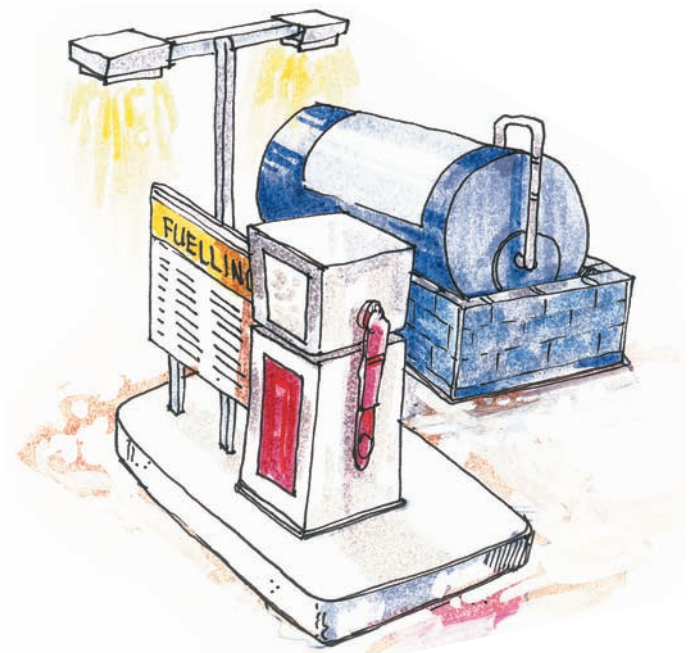

How can you better protect the environment when fueling?

When Fueling:

- do not smoke
- turn off your ignition
- **remove any sources of ignition**
- remove nozzle from the nozzle rest
- place nozzle in the fuel tank
- start pump
- **remain with vehicle as it is fueling**
- pump will automatically shut-off
- **do not over ride automatic shut-off**
- turn off pump
- remove nozzle from vehicle fuel tank
- replace nozzle on the nozzle rest
- only use approved portable containers

In case of a spill:

- contain spilled material
- immediately report to supervisor
- clean-up residue into container provided
- complete an incident report

Remember: Make choices that support the environment.

Implement with care

Tug on anything at all and you'll find it connected to everything else in the universe.
